

MOUNTAIN LIONS & YOU

WAYS TO PROTECT YOUR LIVESTOCK AND PETS:

- **Deer-proof your landscape – avoid using plants that deer prefer to eat.**
- **Don't feed the wildlife – you will inadvertently attract mountain lions, which prey upon them.**
- **Install motion activated outdoor lighting – to keep any approaching mountain lions visible.**
- **Landscape for safety – remove dense and/or low-lying vegetation that would provide good cover for mountain lions.**
- **Keep pets secure – roaming pets are easy prey for hungry mountain lions. Either bring pets inside or keep them in a kennel with a secure top. Don't feed pets outside.**
- **Keep livestock secure - where practical, place livestock in enclosed sheds and barns at night.**
